

IoT Backend Java Developer (m/w/x)

FULL-TIME

We are looking for Backend Java Developers to work with one of our clients, a leading provider of a M2M/IoT Connectivity Management Platform for the telecommunication industry.

SCOPE OF RESPONSIBILITIES

- Developing and presenting recommendations from analysis of current solution. Assist in code peer reviews, build, and test functional enhancements
- Improving system quality by detecting issues and common patterns and developing standard operating procedures
- Identify areas for code refactoring. Review and contribute to development process and procedures to assist in the continual improvement of the development team activities
- Enhancing applications by identifying opportunities for improvement
- Maintaining and improving existing codebases and peer review code changes
- Liaising with colleagues to implement technical designs
- Investigating and using new technologies where relevant
- Providing written knowledge transfer material

TYPICAL WORKING DAY

- Participate in the full software development cycle: design, develop, test, deploy and maintain
- Design highly complex projects from scoping to production

THE TECHNOLOGIES WE USE

Java, Spring, MuleESB, Kafka, Postgres, Redis, Apache Hadoop, Apache HBase, Apache Phoenix, Apache Spark, Apache Flink, Apache Airflow, Apache Kafka, Python, Spring and many other technologies are used to build Our Connectivity Management Platform to meet the needs of any company providing or using connectivity for the IoT business.

WHAT ARE WE LOOKING FOR

- Bachelor's degree in Computer Science, Mathematics or Telecommunication
- Experienced developer (min. 2+ years) who is not afraid to be a part of a newly created team and help us to build the IoT
- Ability to work in the remote environment
- Proficiency in Java, Spring Framework and object-oriented design skill
- Application architecture and design patterns
- Advanced understanding of different programming concepts ESB, Microservices, Messaging Systems, Relational/NoSQL databases, [REST, GraphQL, SOAP]
- Willingness to develop in one specialization: CAS, DB, ESB, API, OUC-A
- Good spoken/written English

NICE TO HAVE

- Knowledge of at least one of the following technologies: Kafka, Redis, Spring Framework, Spring Security, MuleESB, Docker, REST API, Spring Web Flow, Apereo CAS, Telecommunications protocols
- Designing and documenting public APIs and working in R&D teams
- Java Certifications
- Knowledge of building auto scalable systems

WHAT WE OFFER

- B2B contract or contract of employment
- Flexible working hours and possibility to work remotely
- Competitive compensation
- Interesting and challenging projects in an international environment
- Long-term career and development opportunities
- Office in an attractive location based in Bratislava

Are you interested in working in a dynamic team? Do you like creative freedom and enough space to develop yourself? Are you looking for a company that cares about what it does and the well-being and happiness of its employees? Then you have come to the right place and you'll love working for METIQ!
