

IoT ESB Developer (m/w/x)

FULL-TIME

We are looking for ESB Developers to work with one of our clients, a leading provider of a M2M/IoT Connectivity Management Platform for the telecommunication industry.

SCOPE OF RESPONSIBILITIES

- Identify, analyze, and develop interfaces and integration flows using MuleESB
- Contribute to key phases of the development life cycle
- Develop solutions by designing system specifications, standards, and programming
- Troubleshoot issues and provide bug fixes
- Implement and execute web service API management framework
- Assist project leadership in designing the approach for middleware projects, including selection of technologies, setting technical directions, estimating/planning and directing developers
- Collaborate with enterprise architects and IT program managers to enhance existing business applications and facilitate solutions to meet business requirements
- Architect technical solutions for enterprise systems using the MuleSoft product suite to drive the value equation and adapt to a rapidly changing business environment

TYPICAL WORKING DAY

- Being responsible for developing and maintaining source codes, unit and system testing their code
- Building high quality application solutions to design specifications, standards, and user requirements by developing and testing components in an iterative manner through an agile process
- Updating end-user software and conducting quality control functions

THE TECHNOLOGIES WE USE

Java, Spring, MuleESB, Kafka, Postgres, Redis, Apache Hadoop, Apache HBase, Apache Phoenix, Apache Spark, Apache Flink, Apache Airflow, Apache Kafka, Python, Spring and many other technologies are used to build Our Connectivity Management Platform to meet the needs of any company providing or using connectivity for the IoT business.

WHAT ARE WE LOOKING FOR

- Experience with the MuleESB platform as a Developer with software development experience

- 3+ years of Operations and/or Development experience
- Knowledge of Linux and Unix tools
- Software integration and/or other ESB experience
- Experience working with different adaptors and JMS queues
- Experience with successful implementation of framework-based JEE solutions
- Experience with SOAP and REST
- Experience in Java development
- Background in agile and waterfall methodologies
- Good written/spoken English

NICE TO HAVE

- Knowledge of at least one of the following technologies: Kafka, Redis, Spring Framework, Spring Security, Docker, Spring Web Flow, Apereo CAS, Telecommunications protocols
- Knowledge of SOA architecture, infrastructure design, and development
- Good understanding of relational databases
- Good understanding of WSDL, UDDI, JSON

WHAT WE OFFER

- B2B contract or contract of employment
- Flexible working hours and possibility to work remotely
- Competitive compensation
- Interesting and challenging projects in an international environment
- Long-term career and development opportunities
- Office in an attractive location based in Bratislava

Are you interested in working in a dynamic team? Do you like creative freedom and enough space to develop yourself? Are you looking for a company that cares about what it does and the well-being and happiness of its employees? Then you have come to the right place and you'll love working for METIQ!
