

## IoT Business Analyst (m/w/x)

### FULL-TIME

We are looking for Business Analyst to work with one of our clients, a leading provider of a M2M/IoT Connectivity Management Platform (CMP) for the telecommunication industry.

### SCOPE OF RESPONSIBILITIES

- Participate in sales/bid efforts as well as delivery projects
- Sales/bid
  - Analyse functional feasibility and or necessary customization based on tender and/or customer requirements
  - Provide functional design input for cost calculations, including risks
  - Provide functional design documentation for offers and contracts
- Delivery
  - Work with the customer to design workflows and product configuration based on customers' organisation, business processes, and contract documents
  - Design customer-specific, functional customizations and change requests for the customer and prepare user stories for the development team.
  - Provide input to the project manager for management of implementation tasks and risks
  - High-level analysis of functional aspects of issues found during testing and work with all stakeholders in their resolution
- With your team of peer Business Analysts, establish consistent methodology across all delivery projects and document best practices and lessons learned

### TYPICAL WORKING DAY

- Collaborate with your project team(s), the customer's business analysts and internal product development
- Study functional specifications and requirements
- Work on design documents

### WHAT ARE WE LOOKING FOR

- University degree in a technical or business field (IT or economics) and at least 5 years working experience
- Proven ability to successfully understand business requirements and translate them into instructions for technical implementation teams
- Ideally experience in mobile telecommunications and enterprise IT technology business, with a good understanding of mobile telecommunication networks and OSS/BSS stacks.

- Good knowledge of business analysis methodology and requirements engineering
- Strong problem solving and analytical skill-set
- Proactive and self-motivating team player who is able to work under pressure
- Very good command of English, negotiation and excellent communication skills
- Energy and the will to face challenges and coordinate functional designs for big projects and rollouts

## NICE TO HAVE

- Experience with advanced tools and standards for business process analysis and documentation (e.g. UML, Confluence), requirements engineering and agile development processes (e.g. JIRA, JAMA, Rational Requisite Pro)
- Previous experience with technical systems managing M2M/IoT connectivity for mobile telecommunication providers

## WHAT WE OFFER

- B2B contract or contract of employment
- Flexible working hours and possibility to work remotely
- Competitive compensation
- Interesting and challenging projects in an international environment
- Long-term career and development opportunities
- Office in an attractive location based in Bratislava

Are you interested in working in a dynamic team? Do you like creative freedom and enough space to develop yourself? Are you looking for a company that cares about what it does and the well-being and happiness of its employees? Then you have come to the right place and you'll love working for METIQ!
